

# MOTORISED ROLLER BLINDS

Get Connected with motorisation

## MOTORISATION

**Control your interior blinds using a remote control, tablet, smartphone or voice activated assistant. You choose!**

Automation solutions exist to make our lives more simple and more secure. Using the smartphone app you can control your blinds from anywhere in your home, the country or the world. You no longer need to worry that someone will notice that your blinds have not moved for several days and presume that you are away. Simply lift and lower them whenever you want, even if you are sipping cocktails in Fiji. And if you are home, you don't need to find your phone, just install Amazon Echo or Google Home and simply tell Alexa to lift or lower your blinds for you.

These systems are so smart you can just say - "Alexa I want to watch TV." and the blinds will come down, the lights will dim. Effortless control with the whisper of a command. Use your modern app to create specific scenes and moods with the touch of one button.

### Morning Wake Up Button

All the blockout blinds in your bedroom lift leaving the sunfilter blinds in place to give you a soft morning glow and privacy while you prepare for your day. In your living areas all the blinds will lift.

### Watching TV Button

All the blockout blinds in the TV room lower to reduce screen glare, however the blinds in the other rooms do not move so the whole house is not dark.

## FABRICS

### SUNFILTER

Sunfilters have earned their popularity through making your indoors more environmentally friendly. While they effectively block a great deal of heat and UV, they do not completely block your view. At night with the light on, you will see in through a Sunfilter blind. Sunfilter blinds are incredibly durable and easy to clean. They don't collect dust and if anything spills on them they can be wiped down with warm soapy water and a soft cloth.

### LIGHTFILTER

This range of fabrics is in between a Sunfilter and a Blockout blind. They have a higher degree of light diffusion than a Sunfilter fabric but will still allow light into the room which creates a lovely soft light tone. You cannot see out through these fabrics during the day and at night anyone outside would only see a slight shadow effect if you were close to the window.

### BLOCKOUT

Blockout blinds provide you with evening privacy and will help block the sun out. The majority of the Blockout fabrics have a backing that will increase the thermal efficiency of the fabric. This white backing means that you can vary the colours of the blinds in different rooms to match your décor but have a uniform look on the outside.

## UPGRADE TO MOTORISATION TODAY!

Once an expensive, luxury product, motorised blinds are now affordable for all home owners. At Santa Fe we can offer you a range of motorisation options to fit your budget and your lifestyle. We can manufacture your blinds with Somfy, Acmeda or Uniflex motors.

**somfy.**

**ROLLEASE  
ACMEDA**

**Uniflex**

Motorising your blinds not only creates a clean look in your home with the removal of dangling cords and chains, but it will increase the life of your investment because the fabric will not be subjected to the constant wear and tear of a chain rubbing down the side. The other benefit is that by removing the chains, your children and pets will no longer risk becoming entangled in potentially lethal cord loops.

Effortless control of your roller blinds is now available with a large range of hardwired or rechargeable battery motors. The modern battery motors mean you can retrofit motorised blinds into any home without the need for costly wiring.

## FEATURES & BENEFITS

- Custom made to your order.
- Superior motors able to lift up to 13sqm of blind fabric.
- Strong 45mm tube.
- Wireless motorisation available on all fabrics.
- Control via remote, app or voice activation.
- Retro fitting - no wiring required.
- Extended fabric life - no chains rubbing on fabric.
- Rechargeable 12 volt Li-Ion battery - solar or power.
- No cords for a pet and child safe home.
